

# MICRO-SILVER BG™

MeproVet®

---

Skin-protection and regenerative gel

---

for cattle, horses, sheep and goats

The gel serves for local care and protective covering of the severely stressed and sensitive parts of the skin.

**Composition:**

Micro-Silver BG™, dexpanthenol, zinc gluconate, hyaluronic acids, zinc oxide, lavender oil and bergamot oil.

**Application:**

Apply the product once or twice daily, if possible, and rub it well into the skin to protect and care for the sensitive and affected parts of the skin.

Do not apply the product to mucous membranes.

**Special properties:**

MicroSilver BG™ serves for local care and protective covering of severely stressed and sensitive parts of the skin, like for examples inner thighs of lower legs of cattle, as well as in cases of summer eczema and sore fetlock joints of horses.

MicroSilver BG™ reinforces the natural parts of the skin, whereby it positively influences the skin's regeneration.

**Storage:**

Store the product between +15 °C and +25 °C in a dry place, protected from light.

Keep out of reach of children.
