

Aluminium-Spray

MeproVet

Film-forming and breathable protective spray for animals

Ingredients

Colloidal aluminium

Propellant gas: butane / propane

Field of application

For the protective covering of hairless skin areas in animals with a fine elastic, breathable and metallic protective film against contamination and other harmful environmental influences.

Instructions for use

In a draught-free environment and at a distance of about 20 cm from the skin spray approximately for 1 - 2 seconds.

If necessary, repeat application of the protective film several times a day.

Use externally only!

Do not spray into the eyes!

Immediately wipe dry any unintentionally sprayed areas.

After drying, clean with acetone or 70% alcohol.

Shake vigorously before use!

Hazard and precautionary statements

Extremely flammable aerosol.

Pressurised container: May burst if heated.

Causes serious eye irritation.

May cause drowsiness and dizziness.

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources.

No smoking.

Do not spray on an open flame or other ignition source.

Do not pierce or burn, even after use.

Wear protective gloves/protective clothing/eye protection/face protection.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

If eye irritation persists: Get medical advice/attention.

Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.

Repeated exposure may cause skin dryness or cracking.

Inadequate ventilation and/or use can lead to the formation of explosive gases/ highly flammable mixtures possible.

Contains

Acetone; propan-2-on; propanone; 2-propanol; isopropyl alcohol; isopropanol; ethyl acetate
